San Francisco, CA

PROFESSIONAL SUMMARY

Senior Program Manager with 11 years at Google running operations programs across Geo/Mapping imagery collection and Google Express e-commerce. Built and scaled physical operations from zero - field teams, hub throughput, supply chains, vendor contracts - and led the wind-down of a $500M product line. Since 2026, building and operating agentic automation and multi-model LLM pipelines as an independent AI consultant, following film and media production management from 2022. AWS Certified AI Practitioner and Cloud Practitioner, with the Google AI Professional Certificate and an AA in Film Production from City College of San Francisco (2026).

CORE COMPETENCIES

Agentic automation | multi-model LLM pipelines | AI-native workflow redesign | scheduled autonomous services | AI skill development (Claude Code) | adversarial review of AI output | model training and evaluation (LightGBM/scikit-learn) | text embeddings (Hugging Face sentence-transformers)

WORK EXPERIENCE

AI Tooling and Agentic Automation

2026 - Present

Self-Employed AI Consultant

- Build and operate multi-model pipelines routing work across several LLM providers, plus scheduled autonomous services running unattended against production data with integrations to seven external systems.
- Built and shipped a booking and payments product for a specialized-agriculture client, owning requirements through delivery.
- Built and published an open-source Claude Code skill, an adversarial review committee of five blind reviewers and an independent manager (github.com/bscoggin-dev/skeptic-committee).
- Trained and evaluated a film score prediction model in Python with LightGBM and scikit-learn on 441 personal ratings, using repeated 5-fold cross-validation against a crowd-score baseline. The chosen model reached 0.76 correlation with held-out ratings and now scores about 35,700 unseen films for recommendations.
- Generated text embeddings for 275,807 films with two open-source Hugging Face models (BAAI bge-small and bge-base through sentence-transformers) in a private Kaggle notebook on a free T4 GPU, sourced from a public Kaggle dataset.
- Compared the embedding features against a simpler genre and metadata model, found no gain beyond fold-to-fold noise, and shipped the simpler model. Each stage ran from a written plan with automated tests and an independent code review, and one review caught an ID truncation bug that had mis-joined catalog records in BigQuery.

Film & Media Production

Jun 2022 - Apr 2026

Freelance Production Management

- Production management and logistics on short films & commercial shoots, alongside an AA in Film Production at City College of San Francisco.

Career Break

Jun 2020 - Jan 2024

Family and Health

- Time with family through the pandemic, then surgery and recovery, with part-time freelance production and coursework alongside. Fully recovered and back to work.

Google

Feb 2017 - Jun 2020

PMO Program Manager

Mountain View / San Francisco Bay Area, CA

- Led the shutdown of Google Express ship-from-store operations, eliminating $500M in costs.
- Worked with counsel and provided facts for litigation proceedings.
- Executed the "merchant direct" fulfillment migration off in-store fulfillment models, increasing SKU availability and diversity by 50% and reducing VCPO by ~15%.
- Transitioned 35% of TVC labor to a single-source vendor management company, eliminating co-employment risk and saving $100M in vendor contracts for 2019.
- Owned the asset distribution model and security policy planning for 500+ store locations and 2,500+ store operators.

Google

Mar 2015 - Jan 2017

Program Manager, Google Express E-Commerce Operations

San Francisco Bay Area, CA

- Led GSX Southeast expansion, adding 100M customers to the Google Shopping network and increasing revenue by $35M YoY.
- Pitched a "Distributed Stores" coverage model to bring lower-48 2-day SLA service to 250M customers for large-volume merchant partners including Costco, Target, and Whole Foods.
- Reduced merchant launch time by 15%, partnering with Engineering and BD leads to build a launch-control feature that eliminated product latency code for new merchant coverage launches.
- Led the 100% carbon-free shipping program in partnership with the Google sustainability team.
- Eliminated 30% of in-store Google-supplied assets, reducing overall launch times and costs by 5%.
- Opened the GSX Atlanta office, hiring 5 PGM operations leads and 1 market manager.
- Wrote PRDs and specs, and negotiated contracts alongside attorneys.

Google

Nov 2014 - Mar 2015

Rollout Team Manager (full-time, converted from contract)

San Francisco Bay Area, CA

- Led a team of 10 PGMs on strategy and execution, launching new features and processes into Google Express Operations daily workflows.
- Defined procurement strategy and established supply chain partnerships (RFP, RFQ, SOW, BAFO) for GSX operations, including supplier lead-time negotiations, scaling to ~3,500 orders/day across 500+ store locations.
- Wrote SOWs, RFQs, RFPs, and contracts, and negotiated terms alongside attorneys.

Google

Nov 2013 - Nov 2014

Hub Manager (contract)

San Francisco, CA

- Analyzed operations and developed a revised capacity model, reducing labor cost at the SF Hub by 35% and driving overall product costs down.
- Led rollout of a proprietary app in the San Francisco Hub, cutting route prep time by 10% and increasing shipping-system tracking visibility by 90%, resulting in fewer missing parcels.
- Created a training and certification program with standardized efficiency metrics, enabling measurable operator performance.
- Improved operations team morale and work-life balance, decreasing attrition by 10%.

Google

Nov 2012 - Nov 2013

Field Operations Lead (contract)

San Francisco Bay Area, CA

- Created and ramped the Google Shopping Express field operations team from 0 to 30 operators serving all GSX stores, covering scheduling, supply runs, process development, and metric tracking.

- Built procurement practices for GSX including packaging design and production, vehicle and electronic assets, enabling the project to scale from ~200 to ~5,000 orders/day in the Bay Area within 12 months.
- Developed the field operations supply chain, including policies and logistics, eliminating emergency supply runs by 80% and stabilizing in-store operations across all GSX locations.
- Owned development of GSX-branded packaging, partnering with App, Web, BD, Legal, and Marketing to build Google's "physical identity."
- Established vendor agreements for the GSX pilot leading to public launch, reducing bag packaging cost from $1.50 to $0.50 per unit and saving $500K.
- Wrote specs, SOWs, and vendor contracts, and negotiated vendor agreements alongside attorneys.
- Co-filed a design patent on the Google Shopping Express grocery bag (GP-18430-00-US, JMI Ref. GOOG-1395, with Sam Truslow).

JDV Hotels

Mar 2012 - Aug 2012

In-House Web Designer (contract)

San Francisco Bay Area, CA

- Designed and maintained in-house web properties.

Google

Mar 2009 - Feb 2012

Geo / Mapping Operations Lead (contract)

Mountain View, CA

- Revised the imagery pipeline and metric reporting process with the Earth and Maps Imagery teams, increasing operations team capacity by ~25%.
- Coordinated a fleet of 14+ collection vehicles capturing imagery for Google Earth and Maps, meeting the goal of launchable imagery for 50 major cities.
- Automated NovAtel GNSS-to-imagery ingest workflows (GPS/GLONASS positioning data) in partnership with cross-functional leads and engineers, increasing data velocity, volume, and quality by 25%.
- Trained and managed 6 Quality Control Operations Leads, improving auditing accuracy and speed and contributing to a 30% increase in successfully collected imagery.
- Created the collection tracking arrival form feeding all collections into the tracker database, resulting in 4x as many successful collections per day over a two-year period.
- Identified 4 external partners for domestic and international expansion, adding 24 collection vehicles to extend coverage by 20 major cities.
- Redesigned post-flight arrival evaluations with automated quality-check scripts, shortening the QA cycle.

Google X (Project Chauffeur: Prototype Self-Driving Cars)

Nov 2008 - Mar 2009

Mapping Data Specialist & Safety Tester (contract)

Mountain View, CA

- Contributed to the project milestone of 100,000 autonomous miles driven without incident.
- Conducted safety-testing protocols for self-driving vehicles, writing Python scripts that monitored LIDAR, camera, and GPS sensor performance, and logging edge cases in JIRA for engineering teams.
- Led mapping missions along Highway 1 and the greater Los Angeles area, collecting LIDAR data and organizing datasets in SharePoint to support future testing phases.

Long Meadow Ranch

Sep 2007 - Oct 2008

Customer Service and Marketing Administrative Assistant

St. Helena, CA

- Developed and placed content for a new website, online store, and email database.
- Designed and developed weekly email newsletters to customers and members.
- Developed and implemented marketing materials for email and print promotions, and managed order fulfillment and shipping issue resolution.

PROJECTS

Google Shopping Express

google.com/shop/express

EDUCATION

Associate's Degree, Film Production City College of San Francisco — Sep 2023 - Jun 2026

Coursework in Film/TV Production, Broadcasting, and Computer Science.

Bachelor of Arts Boston University — Sep 2000 - May 2004

Theater Conservatory; LAMDA semester abroad.

CERTIFICATIONS

Advanced Project Management	Stanford University	Dec 2015
Google AI Professional Certificate	Google, via Coursera, Coursera verified	Oct 2026
AWS Certified AI Practitioner AIF-C01	Amazon Web Services, Credly verified	Oct 2026 - Oct 2029
AWS Certified Cloud Practitioner	Amazon Web Services, Credly verified	Dec 2025 - Dec 2028
Splunk Fundamentals	City College of San Francisco	
Fundamentals of Artificial Intelligence	City College of San Francisco	2026
Fundamentals of Cloud Computing & SQL	City College of San Francisco	
Creative Engineering Certificate	Mark Rober / Monthly	

SKILLS

Tools and Technical: BigQuery, Python (scripting), Training and certification programs, vendor management, cross-functional execution, process design and SOPs, capacity modeling, resource planning, procurement (RFP/RFQ/SOW/BAFO), supply chain operations, PMO, risk mitigation, Agile, Scrum, Production management (prep, shoot, wrap), technical logistics, asset allocation, location permit coordination, generative AI for pre-production automation, Adobe Creative Suite, Avid Pro Tools, AWS (Certified AI Practitioner, Certified Cloud Practitioner), cloud-hosted collaboration repositories, ingestion and quality-control pipelines, GIS, GNSS positioning (GPS/GLONASS, NovAtel), aerial and ground imagery collection, LIDAR data collection, imagery ingest and quality-control pipelines, SQL, Splunk (KPI and log analytics), HTML, CSS, Spanish
