San Francisco, CA

PROFESSIONAL SUMMARY

Senior Program Manager with 11 years at Google running operations programs across Geo/Mapping imagery collection and Google Express e-commerce, now pairing that big-tech operational rigor with hands-on production experience on active film sets. Built and scaled physical operations from zero - field teams, hub throughput, supply chains, vendor contracts - and led the wind-down of a \$500M product line. Since 2022, working in film and media production management and bringing the same capacity modeling, scheduling discipline, and cross-functional execution to set-level logistics. Completed an AA in Film Production at City College of San Francisco in 2026. AWS Certified Cloud Practitioner with current SQL, Splunk, and applied-AI credentials.

CORE COMPETENCIES

Capacity modeling

resource planning

cross-functional execution

procurement (RFP/RFQ/SOW/BAFO)

vendor management

supply chain operations

PMO

process design and SOPs

WORK EXPERIENCE

Google

Feb 2017 - Jun 2020

PMO Program Manager

Mountain View / San Francisco Bay Area, CA

- Led the shutdown of Google Express ship-from-store operations, eliminating \$500M in costs.
- Executed the "merchant direct" fulfillment migration off in-store fulfillment models, increasing SKU availability and diversity by 50% and reducing VCPO by ~15%.
- Transitioned 35% of TVC labor to a single-source vendor management company, eliminating co-employment risk and saving \$100M in vendor contracts for 2019.
- Owned the asset distribution model and security policy planning for 500+ store locations and 2,500+ store operators.

Google

Mar 2015 - Jan 2016

Program Manager, Google Express E-Commerce Operations

San Francisco Bay Area, CA

- Led GSX Southeast expansion, adding 100M customers to the Google Shopping network and increasing revenue by \$35M YoY.
- Pitched a "Distributed Stores" coverage model to bring lower-48 2-day SLA service to 250M customers for large-volume merchant partners including Costco, Target, and Whole Foods.
- Reduced merchant launch time by 15%, partnering with Engineering and BD leads to build a launch-control feature that eliminated product latency code for new merchant coverage launches.
- Led the 100% carbon-free shipping program in partnership with the Google sustainability team.
- Eliminated 30% of in-store Google-supplied assets, reducing overall launch times and costs by 5%.
- Opened the GSX Atlanta office, hiring 5 PGM operations leads and 1 market manager.

Google

Nov 2014 - Mar 2015

Rollout Team Manager (full-time, converted from contract)

San Francisco Bay Area, CA

- Led a team of 10 PGMs on strategy and execution, launching new features and processes into Google Express Operations daily workflows.

- Defined procurement strategy and established supply chain partnerships (RFP, RFQ, SOW, BAFO) for GSX operations, including supplier lead-time negotiations, scaling to ~3,500 orders/day across 500+ store locations.

Google

Nov 2013 - Nov 2014

Hub Manager (contract)

San Francisco, CA

- Analyzed operations and developed a revised capacity model, reducing labor cost at the SF Hub by 35% and driving overall product costs down.
- Led rollout of a proprietary app in the San Francisco Hub, cutting route prep time by 10% and increasing shipping-system tracking visibility by 90%, resulting in fewer missing parcels.
- Created a training and certification program with standardized efficiency metrics, enabling measurable operator performance.
- Improved operations team morale and work-life balance, decreasing attrition by 10%.

Google

Nov 2012 - Nov 2013

Field Operations Lead (contract)

San Francisco Bay Area, CA

- Created and ramped the Google Shopping Express field operations team from 0 to 30 operators serving all GSX stores, covering scheduling, supply runs, process development, and metric tracking.
- Built procurement practices for GSX including packaging design and production, vehicle and electronic assets, enabling the project to scale from ~200 to ~5,000 orders/day in the Bay Area within 12 months.
- Developed the field operations supply chain, including policies and logistics, eliminating emergency supply runs by 80% and stabilizing in-store operations across all GSX locations.
- Owned development of GSX-branded packaging, partnering with App, Web, BD, Legal, and Marketing to build Google's "physical identity."
- Established vendor agreements for the GSX pilot leading to public launch, reducing bag packaging cost from \$1.50 to \$0.50 per unit and saving \$500K.
- Co-filed a design patent on the Google Shopping Express grocery bag (GP-18430-00-US, JMI Ref. GOOG-1395, with Sam Truslow).

JDV Hotels

Mar 2012 - Aug 2012

In-House Web Designer (contract)

San Francisco Bay Area, CA

- Designed and maintained in-house web properties.

Google

Mar 2009 - Feb 2012

Geo / Mapping Operations Lead (contract)

Mountain View, CA

- Revised the imagery pipeline and metric reporting process with the Earth and Maps Imagery teams, increasing operations team capacity by ~25%.
- Coordinated a fleet of 14+ collection vehicles capturing imagery for Google Earth and Maps, meeting the goal of launchable imagery for 50 major cities.
- Automated NovAtel GNSS-to-imagery ingest workflows (GPS/GLONASS positioning data) in partnership with cross-functional leads and engineers, increasing data velocity, volume, and quality by 25%.
- Trained and managed 6 Quality Control Operations Leads, improving auditing accuracy and speed and contributing to a 30% increase in successfully collected imagery.
- Created the collection tracking arrival form feeding all collections into the tracker database, resulting in 4x as many successful collections per day over a two-year period.
- Identified 4 external partners for domestic and international expansion, adding 24 collection vehicles to extend coverage by 20 major cities.
- Redesigned post-flight arrival evaluations with automated quality-check scripts, shortening the QA cycle.

Google X (Project Chauffeur: Prototype Self-Driving Cars)

Nov 2008 - Mar 2009

Mapping Data Specialist & Safety Tester (contract)

Mountain View, CA

- Contributed to the project milestone of 100,000 autonomous miles driven without incident.
- Conducted safety-testing protocols for self-driving vehicles, using Python scripts to monitor LIDAR, camera, and GPS sensor performance and logging edge cases in JIRA for engineering teams.
- Led mapping missions along Highway 1 and the greater Los Angeles area, collecting LIDAR data and organizing datasets in SharePoint to support future testing phases.

Long Meadow Ranch

Sep 2007 - Oct 2008

Customer Service and Marketing Administrative Assistant

St. Helena, CA

- Developed and placed content for a new website, online store, and email database.
- Designed and developed weekly email newsletters to customers and members.
- Developed and implemented marketing materials for email and print promotions, and managed order fulfillment and shipping issue resolution.

"Slumped Over Man" (Short Film)

Feb 2026 - Apr 2026

Production Manager

- Managed technical logistics and material allocation across all production departments using Google Workspace tools.
- Coordinated pre-production planning, marketing, scheduling, and shot-list planning through deployment of generative AI tools, streamlining the overall production cycle by 10%.

Perhaps Productions (AMEX SIGMA w. Guy Raz)

Oct 2025

Production Specialist

- Managed production logistics, vehicle delivery, and team material asset allocation using Google Workspace tools, ensuring 100% on-time production asset delivery and return.

Hotbed LLC

Jun 2025

Field Operations Coordinator

- Executed safety audits and operational checklist protocols during high-speed filming, ensuring zero safety incidents and maintaining strict quality standards.

City College of San Francisco

Jan 2025 - Feb 2025

Cinema Department Equipment Manager

- Managed cinema department equipment inventory and checkout.

Unsavory Elements (Independent Feature)

Dec 2024 - Jan 2025

Production Assistant

- Executed planning for production start and supported the production associate team with cast travel and logistics.
- Developed and managed scheduling tools for team management.

ScoNeil Productions

Jun 2022 - Jan 2023

Podcast Producer

- Directed end-to-end development, audio editing, and distribution channels for independent podcasts, expanding the audience base to approximately 1,000 active weekly listeners.

AI Tooling and Agentic Automation

2026 - Present

Self-Employed AI Consultant

- Build and operate multi-model pipelines routing work across several LLM providers, plus scheduled autonomous services running unattended against production data with integrations to seven external systems.
- Built and shipped a booking and payments product for a specialized-agriculture client, owning requirements through delivery.

PROJECTS

Google Shopping Express

google.com/shop/express

EDUCATION

Associate's Degree, Film Production	City College of San Francisco	Sep 2023 - Jun 2026
Coursework in Film/TV Production, Broadcasting, and Computer Science.		
Certificate of Study	University of California, Berkeley	2011 - 2012
Graphic Web Design	Santa Rosa Junior College	2006 - 2008
Bachelor of Arts	Boston University	Sep 2000 - May 2004
Theater Conservatory; LAMDA semester abroad.		

CERTIFICATIONS

Advanced Project Management	Stanford University	Dec 2015
AWS Certified Cloud Practitioner	Amazon Web Services, Credly verified	Dec 2025 - Dec 2028
Splunk Fundamentals	City College of San Francisco	
Fundamentals of Artificial Intelligence	City College of San Francisco	2026
Fundamentals of Cloud Computing & SQL	City College of San Francisco	
Creative Engineering Certificate	Mark Rober / Monthly	

SKILLS

Tools and Technical: risk mitigation, Agile, Scrum, Production management (prep, shoot, wrap), technical logistics, asset allocation, location permit coordination, Adobe Creative Suite, Avid Pro Tools, AWS (Certified Cloud Practitioner), cloud-hosted collaboration repositories, ingestion and quality-control pipelines, GIS, GNSS positioning (GPS/GLONASS, NovAtel), aerial and ground imagery collection, LIDAR data collection, imagery ingest and quality-control pipelines, SQL, Splunk (KPI and log analytics), generative AI for pre-production automation, agentic automation, Python (scripting), HTML, CSS, Spanish
